### ACADEMIC APPOINTMENTS

**PhD Student**, University of Arizona

**Research Assistant**

*Department of Mathematics* Fall 2022 - present

Explore causal discovery methods to extract functional connectivity between neurons from spike train data containing hippocampal replay instances, using data generated from NEURON.

Advisors: Jean-Marc Fellous, Michael Chertkov

*Department of Computer Science* Fall 2019 - Spring 2022

Implemented an approximation of the marginal likelihood for a G-Wishart distribution. The project focused on a Bayesian approach to statistical learning of sparse graphical structures using G-Wishart distribution to model different levels of functional brain connectivity.
